Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 9-17 have been cancelled by Applicant.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/20/2006 has been entered.

Specification

3. The amendment filed 3/20/2006 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the newly added limitations in claims 1, 20 with respect to the coefficient of thermal expansion of the inner frame being less than that of the outer frame or pellicle. The Specification as originally filed discloses inner frame having CTE which is equal to or greater than the CTE of the outer frame, and also greater than the CTE of the pellicle (paragraphs 0028-0030).

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Objections

4. Claim 19 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 19 fails to further limit claim 1.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1-8, 18-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention, for the reasons stated in the objection to the amendment filed 3/20/2006 under 35 U.S.C. 132(a) -- i.e., the newly added limitations in claims 1, 20 with respect to the thermal coefficient of thermal expansion of the inner frame being less than that of the outer frame or pellicle.

Terminal Disclaimer

7. The terminal disclaimer filed on 3/20/2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of a patent issuing

Art Unit: 1773

from Application 10/649,355 has been reviewed and is accepted. The terminal disclaimer has been recorded.

8. The provisional double patenting rejection in the previous Office Action has been withdrawn in view of the Terminal Disclaimer filed 3/20/2006.

Response to Amendment

9. The rejections under 35 U.S.C 103(a) in the previous Office Action have been withdrawn in view of Applicant's amendments. However, the Examiner's withdrawal of these rejections does not constitute a concession as to the applicability or non-applicability of the previously cited prior art to the previously presented claims or to the claims as presently amended. Upon cancellation of any new matter, the rejections may be reinstated.

Response to Argument

10. Applicant's arguments filed 3/20/2006 have been considered but are moot in view of the new ground(s) of rejection based on the presence of new matter. However, the Examiner makes no concession as to the applicability or non-applicability of the previously cited prior art to the previously presented claims or to the claims as presently amended. The Examiner reserves any discussion as the merits of the previously cited prior art references until the issue of new matter has been resolved.
